PROFAB
RISER DOORS

Visually impacting, concealed riser doors and access panels, where the façade of the riser door can be clad in different materials including stone, marble, ceramic and tile.

Profab Access' VISION 8000 Series range of access panels and riser doors provide access into tiled jointless plaster and plasterboard walls where access to mechanical and electrical services is required. Specified in commercial, residential and public buildings, the access panels and riser doors are supplied with a metal door tray lined with tile backing board, so the chosen cladding can be applied on site delivering the highest standards in fire safety, security and practicality with a visually impacting finish.

» BENEFITS

- Available as an access panel or riser door
- A simple yet secure means of accessing building services through ceramic, marble or stone clad walls
- Visually impacting within an overall design
- Façade of the access panel or riser door can be clad in stone, marble, ceramic and tile
- Concealed for a seamless aesthetic finish
- High performance range, for vertical use with frame and lock options
- Single door (SD) or double door (DD) configurations
- Easy to install and lockable
- Fully recyclable at end of life

AVAILABLE OPTIONS:

- » Non-fire rated access solutions
- » CERTIFIRE fire rated up to 120 minutes, bi-directionally fire tested for fire integrity
- » EI60 fire rated up to 60 minutes for fire integrity and insulation

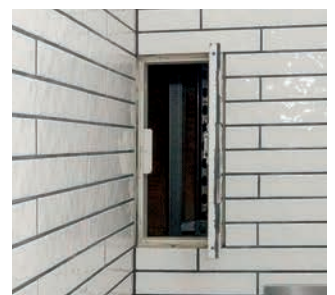

» FIRE RATED PERFORMANCE

- Only non-combustible cladding material must be used. The material can be mechanically fixed or bonded using a non-combustible adhesive e.g. Vitcas heat resistant tile adhesive
- Fire tested to BS EN 1634-1:2000
- CERTIFIRE fire rated up to 120 minutes
- Bi-directionally tested for fire integrity from both sides
- 33 dB acoustic shielding as standard
- Airtight to Part L
- All standard panels are for internal use only and only in areas of normal humidity

» MANUFACTURED TO ORDER

Our VISION 8000 Series access panels and riser doors are made to order to suit the specific tile module size. They are available in sizes from 200 x 200 mm minimum access panels to 1050 x 3000 mm maximum for a single riser door (SD). Size refers to outer frame size.

Our technical team who will assist you to determine the correct specification and dimensions for your project.

The VISION 8000 FR Series range of riser doors are bi-directionally fire tested to ensure fire integrity from both sides and are third party certified

Ask us for our latest test reports and certification to ensure legal compliance
